Deluxe Suspension Seat

Ergonomically designed, adjustable suspension seat allows the operator to ride in comfort no matter what the task may be. A pocket on the back of the seat allows easy access for the operator's manual.

Ergonomic Joystick Lever

An ergonomically designed joystick lever for front loader operation is standard on NX series tractors.

Powerful HST Transmission

HST models feature performance-proven, heavy duty HST drives that deliver power smoothly and efficiently. The three range transmission (Hi/ Mid/ Low) with twin pedal operation makes your job easier, smoother and safer.

The fuel efficient and rugged
KIOTI NX Series

Modern and Elegant Design

The modern and elegant hood design provides the operator with excellent visibility and enables quick and convenient access for daily maintenance.

Torque Compensation

This feature enables the engine to maintain a consistent and stable torque level under all conditions.

Eco-Friendly Diesel Engine

The new Common Rail Diesel Engine (CRDI) improves fuel efficiency while reducing noise levels. With this eco-friendly Tier 4 engine, the NX series offers the operator a quiet work environment with powerful performance.

HST Linked Pedal

When the HST linked pedal is engaged, the HST pedal and the engine rpm is synchronized. This reduces fuel consumption and simplifies tractor operation for a variety of utility and loader applications.

Turn Assist Control

The optional Turn Assist Control kit will drop the engine rpm by 10% automatically when turning sharply. This feature allows for more precise work and reduces fuel consumption during sharp turns.

Anti-Stall Function

When the "Anti-Stall function" is engaged, the tractor will protect itself from instant engine stall when there is momentary engine overload. The operator can also fix and set maximum speed limit when safe and precise working is needed.

Projection Head and Working Lamp

With the new projection head and working lamp, the operator will experience safer and easier operation after the sun goes down.

PTO Cruise Control

With one touch, engine speed may be set to maintain steady PTO rpm to maximize working efficiency. When engaged, the operator may change the engine rpm by simply pressing a switch to increase or decrease the rpm.

True Speed Cruise Control

Electronic HST control system enables the tractor to maintain a set speed no matter what the condition of the ground or load is. This is a very useful feature for work requiring a set speed for precise coverage or application.

Hydraulic Independent PTO

The standard rear PTO is easily engaged by the simple push of a button. A safety interlock prevents the engine from starting when the PTO switch is left on. All models come standard with a selectable manual or automatic PTO option. When the Auto PTO is engaged, the PTO will automatically shut off when the 3-point control is raised, eliminating exposure to the running implements.

Window Wiper

The standard window wiper(rear optional) improves window visibility and keeps the window free from rain and dust.

Panoramic View

The comfortable cab with upgraded interior minimizes operator fatigue even after a long work day. The improved wiper position maintains a clear view for the operator.

Advanced Air Conditioning System

The improved Cooling and Heating system will ensure comfortable working conditions for the operator year round.

Convenient Control Lever

An easy access lever controls lights, horn and signals and is located on the right hand side of the steering column.

Power Steering

Hydrostatic power steering minimizes the effort required to make tight, repetitive turns. The steering wheel tilts with the simple push of a lever, allowing easy adjustment to fit the operator needs.

Front End Loader

The Kioti KL6010 front end loader is specifically designed for the NX series tractors, providing efficient performance with single lever joystick control. The Kioti loader, with a built in parking stand, is designed to be quickly and easily attached and detached. KL Series loaders utilize the tractor's hydraulic system, feature single-lever control with float and come with a bucket level indicator.
