

« Super-Tilt »

Hydraulic Dumping Wagons and Trailers

Estate & Hobby TRAILERS

Super-Tilt makes it easy.

Built with the same quality and durability as our full size Super-Tilt trailers, these small but mighty trailers can handle the tough loads from 1-5 tons. Designed for smaller tractors, their compact size makes them perfect for getting into places larger trailers can't.

For loads that need more volume, side extensions are available for the 1 and 2 ton trailers. From mulch, to bedding soil, to fire wood, these trailers are ready to tackle your weekend chores and turn them into fun.

WL55

3WD

3-Way Dump

The WL55 3-way dump adds a new dimension in versatility with the ability to dump not only behind, but also to the left and right. The flip down side gates work with a ball mounted cylinder to allow the side dumping action. A flow control valve protects the box from damage by controlling the maximum height. The ingenious design allows you to adapt to the situation getting into tight spaces and delivering your load exactly where you want it.

Large Estate & General Use TRAILERS

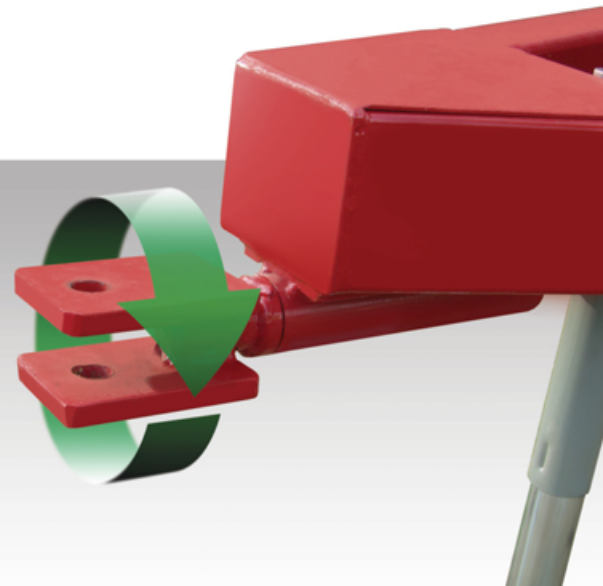

Strong enough for any task.

Large estates need trailers with enough capacity and durability to keep up with the demands of maintaining and developing a large property. The 6 to 12 ton series of trailers have what it takes. With a number of options and configurations, there is a Super-Tilt to meet your demands.

Pivot Tongue

The Large Estate Series trailers introduce a new safety and damage protection feature: the rotating tongue allows the trailer to flex independently of the tractor hitch. This prevents damage and increased safety in the event of trailer tipping.

Grain & Forage

TRAILERS & WAGONS

Today's farming demands higher capacity, versatility & time savings.

These wagons and trailers meet all of these criteria. From forage collection to grain transport, the Super-Tilt was designed and built with versatility in mind. With large self opening rear doors and a 47 degree tilt, the Super-Tilt is a natural choice for today's forage collection. Now, lock down the rear door and open the grain chute and you have a large capacity efficient alternative to conventional gravity wagons all in the same unit. With capacities from 14 to an amazing 23 tons, these dumpers can take whatever you can throw at them - it's no wonder they call them Super-Tilt.

Heavy Duty Gravel Dumper

TRAILERS

**WL21HDT
WL23HDT**
(shown with optional
front mount hoist)

Built to take
on the densest,
toughest loads.

These trailers stand up and dump where others are left in the dirt. The floor of the box has been upgraded to 1/4 inch steel to take the abuse of these heavy loads. If you need even more durability, you have the option of 3/8" steel floor. Designed to take on the punishing task of dumping gravel, these heavy-duty trailers can easily handle whatever you throw at them. For even more lifting power there is the option for a front mounted hoist, which increases hoist capacity to an incredible 30 tons. For sloppy or difficult loads there is an optional hydraulic tailgate to give you even more control.

If you need a trailer to dump the toughest loads don't get left in the dirt, get a Heavy Duty Super-Tilt.
