NOBODY KNOWS HAY LIKE HESSTON.

For more than 60 years, Hesston® has been dedicated to one thing: creating innovative products that produce quality hay. Since 1955, we've been recognized as the self-propelled windrower innovator, and have dedicated ourselves to owning the word "first." As in, the first hydrostatic windrower. The first center-pivot mower-conditioner. The first large square baler. It all adds up to make us the first choice of hay professionals across North America.

Announcing the next leap forward from the company that invented the category: the new WR9900 Series Self-Propelled Windrowers. These four new models help you produce the quality hay you've come to expect from Hesston, with added power to handle all crop conditions, a brand new cab for more comfort and greater hydraulic capacity for increased productivity.

Make hay pay.

The WR9900 Series comes with all new headers that offer higher productivity, faster field speeds and more control. You can enjoy better performance, more comfort and better hay — without the drawbacks of added weight, increased

wheelbase and larger overall dimensions. Increased horsepower provides more capability, with all models having the ability to run disc, auger or draper headers.

A cut above the rest.

No other windrowers can produce Hesston hay, because no other windrowers offer our exclusive combination of power, technology, capacity and comfort, developed in direct response to feedback from farmers like you.

More power to you.

WR9900 Series windrowers range from 160–265 engine horsepower. Hesston now offers a high-power six-cylinder WR9980 option, giving your operation more power than ever before.

Each model features a larger, tandem hydraulics pump for increased hydraulic capacity and control. The added horsepower and hydraulic capacity make the WR9900 Series more capable and versatile, with all four models having the ability to run disc, draper and auger headers.

Model	Engine	Rated HP (kW)	Max HP (kW)	Headers
WR9980	AGCO Power 7.4 L	265 (198)	282 (211)	Disc (13 ft., 16 ft.), draper, auger
WR9970	AGCO Power 7.4 L	235 (175)	250 (186)	Disc (13 ft., 16 ft.), draper, auger
WR9960	AGCO Power 4.9 L	197 (147)	208 (155)	Disc (13 ft., 16 ft.), draper, auger
WR9950	AGCO Power 4.9 L	160 (119)	173 (129)	Disc (13 ft.), draper, auger

See complete specs on page 15.

Roomy and spacious, our new VisionCab offers many additional features to surround you with the ultimate comfort, allowing you to work longer and harder with less fatigue.

New cab styling including roof and outside trim for an updated sleek and stylish look.

Electrically adjustable mirrors (optional) allow the operator to adjust the mirrors from the seat instead of having to adjust the mirrors from outside the cab.

Powerful air conditioning system with 50% greater cooling performance.

Large, curved windshield for increased visibility, providing the operator with a better view of the header and the field.

Foot pegs in the cab increase operator comfort when spending extended amounts of time in the cab.

Bluetooth[®] **capable cab** makes the operator's day easier and provides more convenience for Bluetooth-capable devices.

Larger instructor's seat provides a more comfortable ride for the instructor, as well as a large storage compartment beneath the seat.

New step platform and handrails on the outside of the cab make it safer and easier to step onto the header.

Tinted rear glass increases comfort throughout the day and increases visibility to the monitor.

Deluxe semi-active seat offers operators a more robust seat and much smoother ride as it allows the seat to move not only side to side, but forward and backward as well.

New lighting package features eight front-mounted and two rearmounted lights, providing operators with greater visibility in low-light conditions. LED lights are also optional for even greater visibility.

Standard cab suspension system uses a set of air bags and shock absorbers to limit the vibration felt by the operator, reducing fatigue.

Automatic climate control is included on all WR9900 Series machines.

The front windshield wiper has been added to the standard equipment with a wash function to allow operators to work in adverse conditions.

Adjustable sun shade increases visibility when the sun is low in the sky.

Multiple standard DC connector and USB charging ports for charging devices to keep you connected.

Cab specifications

130 ft.3 of interior cab volume

77 ft.2 of glass area

33 ft.2 of glass on the curved windshield

Technology so smart, it practically windrows for you.

All systems go. Get an instant and more intuitive view with your choice of monitors.

The C1000 is a simple icon-based monitor that is very easy to use.

The C2100 is a simple and intuitive 12.1-in. touch-screen monitor that allows you to monitor machine performance while displaying guidance on the same screen.

WR9900 Series on-board terminal lets you control all of the windrower's main functions, including:

- ⋆ Header speed

- → Data collection (fuel usage, acres, hours, etc.)

A windrower so smart, it talks to itself.

Proprietary software on the WR9900 Series allows a variety of components to communicate electronically and execute many of its functions automatically. These components include:

- OptiCruise[™] speed control

- « Automatic reel speed

The new, user friendly interface makes it easy to monitor windrower performance and adjust settings to field conditions.

Automatic header speed control If engine RPMs are pulled down when cutting high-yielding areas in the field or navigating steep terrain, automatic header speed will increase the hydraulic flow to the header in order to maintain consistent disc header RPM for consistent cutting and conditioning.

Automatic load control If Automatic Load Control is activated, the windrower will automatically adjust ground speed based on engine load and header drive pressure to ensure maximum torque and efficient fuel usage. This reduces the amount of operator intervention, simplifies machine operation and reduces operator fatigue.

Rotary header speed compensation When engaged, the control system will automatically increase the rotary header knife speed as ground speed is increased. This ensures that the ideal amount of crop cut per blade rotation is maintained even as ground speeds change, leading to excellent quality of cut.

OptiCruise speed control This function allows for more precise speed control when operating in rough conditions. The two buttons on the back of the hydro handle allow you to increase and decrease your speed smoothly (0.6 mph increments in first and second speed range, 2 mph in third speed range) without having to move the control handle.

Powerful performance and the versatility you need to get the job done.

The WR9900 Series windrowers feature two different AGCO Power engines, both designed specifically to stand up to the rigors of agricultural use. The WR9950 and the WR9960 are powered by the AGCO Power 4.9 L four-cylinder engine. The WR9970 and WR9980 are powered by the AGCO Power 7.4 L six-cylinder engine.

The WR9900 Series are our most powerful windrowers ever. The increased power of these machines gives operators the versatility to run disc, draper and sickle headers. Don't just take our word for it, run any WR9900 Series windrower and you'll know you're driving the cream of the crop.

AGCO Power engines built especially for ag application, deliver as much as 265 rated horsepower at 2,100 RPM. As field conditions begin to pull the engine RPM down, the windrower can deliver more than 280 horsepower at 1,950 RPM, giving you the torque and horsepower you need to keep going in the field.

Fuel efficiency so impressive you'll be able to power through tough crops with minimal fuel usage. Lower engine RPM, precision fuel metering, common rail fuel injection and advanced SCR emission technology are among a few of the innovative engine technologies that will provide you with consistently lower total fluid consumption — for both diesel and DEF.

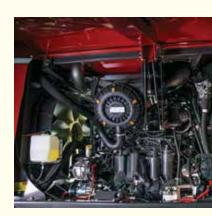

New engine updates for improved performance:

Increased hydraulic and engine cooling capacity ensure the machine runs at its best, even when conditions are at their worst.

Larger AC evaporator offers a 50% increase in AC cooling capacity.

The engine compartment maintains the familiar cool side / hot side design with ground level access for service points to simplify machine service.

Better headers that make the cut.

The WR9900 Series gets new, more capable headers — the 9200 Series disc and auger headers and the new 5400 Series draper headers. These headers offer improved capacity, improved functionality and greater control. All of these improvements lead to higher productivity while maintaining superior cut and windrow formation.

More hydraulic capacity means a 20% increase in available header power on our 16 ft. disc headers.

RazorBar™ disc header model	MF9283	MF9286	MF9295	MF9296
Cutting width ft. (m)	13 (4.0)	13 (4.0)	16 (4.9)	16 (4.9)
Conditioner rolls	2	4	2	4

Draper header model	MF5400-20	MF5400-25	MF5400-30	MF5400-35	MF5400-40
Cutting width ft. (m)	19'9" (6.0)	24'9" (7.5)	29'9" (9.1)	34'9" (10.6)	39'9" (12.1)
Delivery style	Center	Center or side			

Auger header model	MF9226-14	MF9226-16	MF9226-18	MF9246-14	MF9246-16
Cutting width ft. (m)	14 (4.3)	16 (4.9)	18 (5.5)	14 (4.3)	16 (4.9)
Conditioner rolls	2	2	2	4	4

Features	Disc	Draper	Auger
Improved header flotation allows the header to respond better to uneven terrain, providing a superior cut. Flotation accumulator size has been increased and two additional accumulators have been added for smoother operation.	*	*	*
In-cab hydraulic roll tension adjustment makes for easier adjustments in the field.	*		*
Hydraulic roll tension offers more consistent crimp and is much easier to set and adjust.	*		*
Easy unplugging in the event of a plug, hydraulic roll pressure will dump automatically when header is reversed. Upon starting the header, pressure will resume to preset levels.	*		⋖
Automatic reel speed available on headers equipped with hydraulic reel drive. The speed of the reel will adjust to match changes in ground speed without the operator having to make adjustments.		*	*
Quick-attach top link receiver on all headers provides easier attaching and detaching.	×	*	×
Large tandem hydraulic drive pump handles additional power from the engine and delivers more hydraulic flow to the header for increased throughput and functionality.	×	*	*
Increased power transfer with larger hydraulic drive motors, heavy-duty conditioner roll gear box and higher surface area belts deliver additional power to the head.	×		
RazorBar cutterbar is the lowest profile cutterbar on the market. The robust design delivers maximum uptime, superior cut quality and lower ash content for improved hay quality.	*		
Turbulence reduction roll redirects air current from the conditioner rolls downward to improve cutting performance in light crop as well as assist crop flow into the conditioner rolls.	*		
Herringbone-patterned conditioner rolls allow positive crop feeding and even crop distribution for faster dry-down, leading to higher-quality hay.	*		*
Steel-on-steel conditioners crimp instead of crush for better leaf preservation and improved hay quality.	*		*
TwinMax [™] double set of conditioner rolls reduces dry-down time by up to 20%, minimizing respiration losses leading to higher quality hay.	*		*

We proudly support:

We're always at your service.

Our network of dealers They understand what owning a WR9900 is really all about. They'll advise and support you through the selection process, the buying process, operation, maintenance and beyond.

Low-rate, flexible financing Your Hesston dealer and AGCO Finance* offer attractive financing programs to ensure your new WR9900 Series windrower will fit your operating budget. Extremely competitive rates and terms make it easy to purchase, lease or rent.

Even our warranty is high-performance We'll cover you for two years/2,000 hours on engines and one year/parts and labor. It's one of the best warranties in the business.

Quality parts Genuine AGCO® replacement parts are manufactured to the same high standards of quality and dependability as the original parts used on the assembly line. Using original equipment parts will help keep your Hesston WR9900 Series windrower running like new.

Questions? Go to hesston.com Our website opens the door to all sorts of technical information, corporate support and product specifications. Visit the site today to see our full line of hay making products. Even build and price your own machine.

Merchandise and gifts *shopagco.com* See your local Hesston dealer to purchase our collectable WNFR belt buckles.

AGCO Answers At AGCO, customer care isn't just a department. It's a commitment. Contact us with your questions. We'll do our best to answer them promptly, or put you in touch with someone who can. (877) 525-4384 | agcoanswers@agcocorp.com

GLEANER

For more than 25 years, in more than 140 countries worldwide, AGCO has been on a mission to become the single resource farmers can depend on for innovative, leading-edge thinking, equipment and technology. And, today, you know AGCO brands, even if you don't know the AGCO name. While AGCO equipment may not all share the same logo or same color, they all have one thing in common — the ability to help farmers be as productive and profitable as they can possibly be, regardless of the tasks at hand. agcocorp.com
